

UBN PROJECT CASE STUDY

UBNSoftSolutons LLC
Atlanta, GA
PH: 770-355-3168

sales@ubnsoftsolutions.com

Client Profile

- Collaborative, innovative IT company founded since 1986.
- Partners with organizations in healthcare, corporate and government/education industries.
- Over 300 employees with offices throughout the upper Midwest.

At-a-Glance

Client's Business Industry: **IT Solutions, Services and Technologies**

Client's Location: **USA**

Project's Core Solution Area: **SharePoint**

Key Project Challenges

Business Objectives:

- ☐ To get real time business scenario updates.
- ☐ Capability to configure and customize the app as per the need of the user.

Statistics & Numbers:

- ☐ Project Duration – 2.6 years and continuing.
- ☐ Delivery Model - Time & Material
- ☐ Team Size – 8
- ☐ Engagement Model – Offshore
- ☐ Language – C#

The client was constantly on a lookout for the highest levels of technical expertise, operational excellence and employee professional development. The team working on the project faced the following challenges:

- ☐ Client's existing system was old, disarrayed and difficult to understand.
- ☐ Latest technology up gradation will all the functionalities intact as earlier.
- ☐ Designing a new, user-friendly system with an aim for easy usage and up gradation as well.

Solution to the Challenges

Key Business Benefits :

- ✓ Simplified reports in Excel format to visualize the required data.
- ✓ Access to more advance reports with charts, gauges, graphs, maps, indicators etc.

Statistics & Numbers:

- ☐ App Server - Data Tool 2013
- ☐ Framework - .NET 4.5
- ☐ Database - SQL Server 2014
- ☐ Platforms - SQL Server 2005 – SQL Server2014
- ☐ Front End - SQL Server Data Tool for Visual Studio2013

- The client chose us as their consultant and development partner based on our expertise. The recommendations put forward after in-depth analysis of their business needs gave us an edge over competitors.
- The major hindrance for the team was to understand the existing system. The system used age-old techniques that had functionality and efficiency issues. On proper analysis of their objectives, we put forward our methodologies.
- SharePoint has made the requirement easy, and the results are promising. In fact, the outcome of the software was so impressive that we now have got into other areas beyond the initial SharePoint requirement, say CRM.

Feasibility

Key Technology Benefits:

- ✓ The set up keeps pace with changing processes with increased agility.
- ✓ Reports from latest technology offers better performance and usability
- ✓ Reports can be downloaded in zip files from the interface with ease.
- ✓ Performance is much better than earlier version with a new look and feel.

Achievement 1:

Preparation of dashboard reports with tough requirements without any technical difficulties.

Achievement 2:

Compilation of reports for the project using spatial data with set of installed maps and ESRI Shape file.
